August 2003: Golden Jubilee at the
University of São Paulo at Ribeirão Preto College of Nursing

Isabel Amélia Costa Mendes - *Dean EERP/USP*
Ida Mara Brunelli da Silveira - *Academic Technical Assistant EERP/USP*

Memories are part of life, as the poets say. In this Editorial, we invite you, our readers, to examine some important landmarks of this College in commemorating its fiftieth anniversary.

The University of São Paulo at Ribeirão Preto College of Nursing (EERP/USP) was created as a supplement to the University of São Paulo at Ribeirão Preto Medical School (FMRP/USP) by means of State Law 1467, dated December 26 1951. At that time, Ribeirão Preto already stood out as an important commercial and health region in São Paulo State, besides being an educational center, which favored the installation of new medicine and nursing courses.

In March 1952, in response to an invitation by Prof. Dr. Zeferino Vaz, FMRP/USP Director at that time, Gleite de Alcântara started working on the organization of this School, motivated by the proposal to establish a differentiated nursing course that would favor students' integral development of individual, civil and technical qualities. The goal was the formation of a professional able to attend to national health service needs.

The primary objectives traced by Gleite de Alcântara already set forth the pillars of a university institution: educate nurses and nursing aids (teaching); realize scientific investigation in the field of nursing (research) and contribute to the solution of community health problems (extension).

The first nursing formation class group started in August 1953. In principle, recruiting students was an arduous task, demanding intense work for disseminating information about the nursing professional in the community, hospitals and schools.

Scientific investigation in nursing was taking its first timid steps. Gleite de Alcântara was also responsible for the first nursing thesis defense in 1963, called "Modern nursing as a professional category – obstacles to its expansion in Brazilian society". In the 1970's, the College contributed to nursing advance by installing master's courses (1975 and 1979). The jump towards Ph.D. studies was made in 1981, when the Internunit Nursing Ph.D. Program was created in partnership with the College of Nursing (capital), the first in Latin America. To crown its efforts, EERP/USP was designated as a WHO Collaborating Centre for Nursing Research Development in 1988 and continues to be the only nursing college in Brazil to be awarded this distinction.

In the 1990's, the Latin American Journal of Nursing was launched with a view to favoring integration among Latin American nurses through knowledge, as well as contributing to the foundation of professional nursing teaching, research and care actions.

In 2002, EERP/USP was awarded another international distinction, when Chapter Rho Upsilon of Sigma Theta Tau International – Honor Society of Nursing was constituted.

University of São Paulo at Ribeirão Preto College of Nursing
WHO Collaborating Centre for Nursing Research Development, Brazil
Chapter of Sigma Theta Tau International Honor Society of Nursing

The Latin American Bulletin on Nursing is published by the as a WHO Collaborating Centre for Nursing Research Development and distributed to Teaching and Care Institutions and Associations that congregate Nursing professionals in Latin America

Information: Informativo Latino-Americano de Enfermagem - Escola de Enfermagem de Ribeirão Preto /USP - Av. Bandeirantes, 3900 - CEP: 14040-902 - Ribeirão Preto - SP- Brasil. Fone: (016) 602.3461. Fax: (016)630.2561 Site: www.eerp.usp.br/ilaenf - E-mail: ilaenf@eerp.usp.br.

In celebrating its 50 years, EERP/USP is convinced of its contribution to the advance of Brazilian nursing. Until 2002, 1919 nurses had been formed, which corresponds to almost 5% of the total number of professionals registered at the Federal Nursing Council in February 2003. The impact of this College stands out in postgraduate education *stricto sensu*. According to data by the Foundation Coordination for the Improvement of Higher Education Personnel (CAPES), until 2001, there were 594 Ph.D.'s and 2507 Masters in Nursing in Brazil, 41% and 17% of which, respectively, had been formed by EERP/USP.

After circulating for a mere 10 years, the Latin American Journal of Nursing is classified among the best nursing journals published in Brazil, registered in 8 international and 1 national database, besides integrating the SciELO collection.

What extension is concerned, countless partnerships have been closed with health institutions, apart from the FMRP/USP Hospital das Clínicas and the municipal health network. Numerous extension projects have obtained important social results, including thousands of care sessions involving people from all ages, realizing actions for the promotion of health, prevention and recovery from illnesses.

The College is also present in governmental instances, collaborating with the elaboration, implantation, follow-up and evaluation of public health policies.

Apart from the undergraduate course in nursing, nowadays, EERP/USP offers 3 Masters courses, 4 Ph.D. courses (including the Interunit Nursing Ph.D. Program); 3 nursing residence programs, specializations in different areas, besides university extension courses, involving 1000 students approximately. These courses are administered by 69 faculty, 91% of which have obtained at least the Ph.D. title, and are supported by 98 staff members.

The success of this College certainly occurred neither smoothly nor alone. Thus, it is important to thank the city of Ribeirão Preto; all municipal and state health institutions and services, kindergartens and schools; national and international nursing representation instances; the University of São Paulo central administration and the FMRP/USP; the patients assisted in hospitals, ambulatory sectors, clinics; the clients attended by the research and extension groups, more than 5000 students throughout its history and hundreds of faculty and staff.

It is people that give life to the School. Therefore, the Golden Jubilee is for all of us. In this edition, check out some of the activities in commemoration of this 50th anniversary and the program until July 2004.

EERP/USP receives a visit from the Chairperson of SBED – Brazilian Pain Studies Society

Last July, the University of São Paulo at Ribeirão Preto College of Nursing, WHO Collaborating Center for Nursing Research Development, represented by Isabel Amélia Costa Mendes, its Dean, received the visit of Jaime Olavo Marquez, Chairperson of the Brazilian Pain Studies Society (SBED).

With a view to broadening contacts and sharing knowledge, research and experience with EERP/USP, Dr. Marquez talked about the increasing number of SBED associates and professional interest in pain, as a reflection of the work and dedication of the SBED Council.

He highlighted the publication and success of the Society's first textbook, called "Pain – Interdisciplinary Context", of which he is

co-editor and author of two chapters, together with Fátima Faleiros Sousa, EERP/USP faculty, who also wrote one chapter. The first publication occurred in March and, as its edition was sold out in one month, it is currently being reprinted.

On that occasion, Dr. Marquez invited clinical professionals and researchers on pain to the VI Brazilian Pain Congress, promoted by the SBED, which will be organized in Florianópolis, Santa Catarina, in September/2004. Fátima Faleiros Souza was indicated as a nursing representative member of the

Prof.ª. Dra. Isabel, Prof.ª. Fátima, Prof. Dr. Jaime

Scientific Commission for 2003/2004, which will function in collaboration with the Scientific Council of the SBED, under the coordination of the Scientific Director: Dr. Onofre Alves Neto.

For further information, call: (16) 602.3460 / 3398 or e-mail: faleiros@eerp.usp.br, talk to Fátima.

INTERNATIONAL EXCHANGE OF INFORMATION AND RESEARCH AT MICHIGAN SCHOOL OF NURSING

Maria Helena Palucci Marziale - Faculty, Department of General and Specialized Nursing of the University of São Paulo at Ribeirão Preto College of Nursing
Denise Pires - Faculty, Department of Nursing - Federal University of Santa Catarina

The University of Michigan School of Nursing, WHO Collaborating Center for clinical nursing research and training in the field of health promotion, promoted the International Collaborative Research Seminar from June 9 to 13, 2003, in Ann Arbor, Michigan, USA. This Seminar aimed to create collaborative research possibilities in international partnerships.

The Seminar was organized by Dr. Shaké Ketefian, International Director at the University of Michigan School of Nursing and Chairperson of INDEN-International Network for Doctoral Education in Nursing, and involved the School council and researchers from six theme areas: "Adolescent and Family Health, focusing on drugs/substance use", "Interventions for Giving up Smoking", "Behavioral Problems in Demented Persons", "Prevention of Mother-Child Aids Transmission", "Biological Foundation/Support of Social Action and its Role in Health Risk Behavior (such as diet, smoking and little exercise)", "Occupational Health and Safety".

The Seminar was directed at experienced researchers, with knowledge of English, from internationally renowned universities. The invited Universities indicated their candidates, who were selected on the basis of their curriculum vitae, quality and visibility of their scientific production and research projects in the above mentioned areas. On the basis of these criteria, 11 researchers were selected from different countries, two of which were Brazilian.

The selected researchers were divided in groups per theme area, led by researchers from the University of Michigan. Various other researchers from the same University also participated in each group.

Next, we list the selected participants and group leaders in accordance with the research area.

- Adolescent and Family Health, focusing on drugs/substance use:
Dr. Thandisizwe Redford. Mavundla (University of South Africa, South Africa);
Dr. Rungnapa Panitrat (Mahidol

University, School of Nursing, Thailand);

Dr. Rutja Phuphaibul (Ramathibodi Hospital, Nursing Department of Mahidol University, Thailand);
Group Leader: Dr. Carol Loveland-Cherry (School of Nursing, University of Michigan, USA).

- Interventions for Giving up Smoking:
Dr. Kader Parahoo (University of Ulster, Northern Ireland, United Kingdom).

Group Leader: Dr. Joanne Pohl (School of Nursing, University of Michigan, USA).

- Behavioral problems in demented and especially elderly persons:

Dr. Kiyoko Makimoto (Osaka University, Japan).

Group Leader: Dr. Donna Algase (School of Nursing, University of Michigan, USA).

- Prevention of mother-child AIDS transmission:

Dr. Anna Nolte (Rand Afrikaans University, South Africa).

Group Leader: Dr. Jeanne Raisler (School of Nursing, University of Michigan, USA).

- Biological Foundation/Support of Social Action and its Role in Health Risk Behavior (such as diet, smoking and little exercise):

Dr. Esther Gallegos (Autonomous University of Nuevo Leon, Mexico);

Dr. Samar Nayef Nouredine (American University / Beirut, Lebanon);

Dr. Bertha Cecilia Salazar (Autonomous University of Nuevo Leon, Mexico).

Group Leader: Dr. Karen Stein (School of Nursing, University of Michigan, USA).

- Occupational Health and Safety:

Dr. Denise Pires (Federal University of Santa Catarina, Brazil);

Dr. Maria Helena Palucci Marziale (University of São Paulo at Ribeirão Preto College of Nursing, Brazil);

Group Leader: Dr. Sally Lusk (School of Nursing, University of Michigan, USA).

The Seminar program included a series of sessions in research groups, as well as various collective activities for all researchers, among which:

- opening by Dr. Shaké Ketefian, International Director, School of Nursing, University of Michigan;

- presentation of the courses and structure at the School of Nursing by Dean Ada Sue Hinshaw and Research Director Carolyn Sampsel, School of Nursing, University of Michigan;

- visit to the health library at the University of Michigan, Taubman Medical Library, receiving guidelines about the use of the electronic collection;

- lecture about "Research Problem and technical support in nursing research", presented by Dr. Barbara Therrien (Chairperson of the Center for Enhancement and Restoration of Cognitive Function, School of Nursing, University of Michigan);

- lecture about "International research funding" presented by Julie Feldkamp, DRDA, University of Michigan;

- lecture about "Strategies for preparing competitive projects" presented by Sally Lusk (Occupational Health Director, School of Nursing, University of Michigan);

- General discussion and evaluation of the event (Shaké Ketefian, International Director, School of Nursing, University of Michigan).

However, a large part of the activities was realized in specific research groups. As we were part of the research group on Occupational Health and Safety, next, we describe the activities of this specific group, coordinated by Sally Lusk (Occupational Health Director, School of Nursing, University of Michigan). Participants included Oi-Saeng Hong (faculty and researcher in Occupational Health and Safety, School of Nursing, University of Michigan) and Nursing Ph.D. students Delbert, Marty, Raymond and Jeanne, among others.

We participated in the following activities:

- research presentation "Prevention noise-induced hearing loss" developed by Sally Lusk;

- research presentation "Effectiveness of computer-based hearing test and training" developed by Oi-Saeng Hong;

- research project presentation "Relationship between new technologies in health care and health among professionals of the sector: an international study" proposed by Denise Pires;

Da direita para a esquerda: Dra. Denise Pires, Dra. Shako Ketefian, Dra. Sally Lusk, Dra. Maria Helena Palucci Marziale

- research project presentation “Work accidents with piercing or cutting material among Brazilian hospital workers: control, prevention and associated factors” proposed by Maria Helena Marziale;
- technical visit to the Occupational Health Clinic at the Worker’s Health Service of the University of Michigan Health System;
- technical visit to the Chemotherapy Service at one of the University of Michigan hospitals, the Cancer Center and Geriatrics Center;
- realization of an audiometric test and use of computerized instruments for the Prevention of Noise-Induced Hearing Loss. These two programs were elaborated by the occupational health research group under the coordination of Sally Lusk and Oi-Saeng Hong. Both programs consist in associating hearing tests with health education and aim at a behavioral change with respect to the use of an ear protector as a way of preventing and/or limiting hearing impairment;

- teleconference with Claire Caruso from the National Institute for Occupational Safety and Health (NIOSH), about her research in relation to the health of nursing workers;
- technical visit to the Ergonomics Laboratory of the College Of Engineering / University of Michigan. Interviews with Charles Woolley (Senior Research Associate and Lecturer of the Center for Ergonomics) and Sherly S. Ulin (Research Investigator of the Department of Industrial & Operations Engineering);
- meeting with Dr. Lusk and elaboration of proposals for the development of joint research.

We concluded that this experience was extremely important with a view to knowledge acquisition and improvement, which will be used for realizing classes at the undergraduate and graduate levels; for nursing research information exchange; and because it opened up various possibilities of joint research, as well as Graduate and especially Ph.D. student exchange and Postgraduate activities.

University of São Paulo at Ribeirão Preto College of Nursing - EERP/USP, finishes the Specialization Course – Pedagogical Formation in Professional Health Education: nursing

On June 12 2002, EERP/USP started the Pedagogical Formation course in Professional Health Education: nursing, with 195 enrolled nurses from various cities in the region and affiliated with secondary education institutions, which were qualified and selected by the Ministry of Health. For this purpose, eight EERP tutors were made available (faculty and graduate students of the College) through the Teacher Support Group (NAD-USP/RP), who received specific training from the Ministry of Health for this function with a view to realizing the course in the form of distance learning, covering a 660-hour load, developed in eleven modules and structured in three related areas: Contextual (1- education; 2- education, society and culture; 3- education, knowledge, action; 4- education, work, profession); Structural (5- field of action; 6- action bases; 7- action plan; 8- action evaluation); Integrative (9- immersing into pedagogical action in health/nursing; 10- planning an autonomous and significant pedagogical practice in nursing; 11- experiencing an autonomous teaching action in professional nursing education). 37.4% of the total number of enrolled students were lost, corresponding to 20.5% of the students

who cancelled their enrollment, 5.6% who declared they stopped the course and 11.3% who simply gave up. At the end of the course, 122 graduates participated in the Course Conclusion Ceremony in Ribeirão Preto on July 12 2003, with the presence of Representatives from the Ministry of Health, National Public Health School, General Coordination of the Nursing Workers Professionalization Project - PROFABE, the Dean’s Office of EERP/USP and tutors of NAD-USP/RP. At the moment, they are waiting for the publication of the Specialization Course

Conclusion Certificate by the National Public Health School, in accordance with Decree nº 1725, dated 12/06/02, by the Ministry of Education and Culture. Below is a list with the names of the graduates in the Pedagogical Formation course in Professional Health Education: nursing.

EERP/USP in Higher Instances: Invitations and Conquests

Recognizing the excellence of an Institution occurs in various forms, covering the most simple thankfulness, loyalty to delivered services and invitations and tributes it received. For this reason, EERP/USP feels honored by our conquests and by the identification of the talent and work of its faculty, represented by the following circumstances:

Last June, EERP/USP received the Degree of Merit for Valuing Life from the National Antidrug Secretariat of the Institutional Safety Cabinet/ Presidency of the Republic for its performance in the field of drugs.

This recognition is due to the College's contribution to reducing drugs demand in Brazil.

As a result of her indication by Mr. Ricardo Burg Ceccim - Director of the Department for Health Education Management of the Health Work and Education Management Secretariat/Ministry of Health, Maria Cecília Puntel de Almeida, Full Professor at the Department of Maternal-Infant Nursing and Public Health and Chairperson of the Graduation Commission of EERP/USP, will be part of the support group for the development of studies, in the above mentioned group, in relation to the elaboration of a policy for the formation and development of health professionals for the Single Health System (SHS).

Among the strategies included in this proposal, we highlight the establishment of cooperative relations between Brazilian universities and the Health System with a view to unleashing processes that lead to an approximation between the profiles of graduated professionals, knowledge production and the delivery of services by universities in response to the health needs of the population and the SHS.

Rosalina Aparecida Partezani Rodrigues - Full Professor and General and Specialized Nursing Department Head at EERP/USP, was designated a member of the Work Group that will elaborate criteria for the opening and functioning of long-term care institutions for the elderly, from the perspective of Human Rights.

The activities of this group are considered to be in the public interest and relevant. The group is directly lined up with the Special Human Rights Secretariat of the Presidency of the Republic, in conformity with Decree nº 80 - published in the Brazilian Diário Oficial da União - Section 2 on 04.06.2003.

GOLDEN JUBILEE
eerp/usp 1953-2003

Celebrating 50 Years

The EERP/USP has been commemorating its Golden Jubilee for more than 12 months. We have reasons and events for another 12. The conquests and victories experienced during the last 50 years fill us with joy and continue offering reasons for celebrating.

Let us briefly look back on some remarkable moments in the Golden Jubilee celebrations:

- March to August/2002 – Contest for choosing the Golden Jubilee logo – counting on a significant and diversified participation by the USP community, it was hard to choose, among so much good work, the logo that would represent our commemoration in the best way. Finally, the logo created by Solange Aparecida da Silva, staff member at the FMRP Hospital das Clínicas was chosen to accompany our correspondence. The prize was awarded during a simple ceremony with a presentation by the students of the Music Department of the University of São Paulo Ribeirão Preto School of Communication and Arts/USP, under the conduction of Rubens Ricciardi.
- August 24/2002 - EERP/USP goes to Praça da Catedral – to present, disseminate and orient the community about the College's extension services. On a beautiful and merry Saturday morning, 15 research groups participated in the event during which faculty, staff, undergraduate and postgraduate students attended the population. Painting, music and dance were mixed with care and orientation to the public, which joined us in celebrating the anniversary of our School.
- December 12/2002 – Introduction of the EERP/USP Golden Jubilee seal sticker – During the EERP/USP Community Confraternization party, the School Council, represented by Isabel Amélia Costa Mendes – Dean, and Margarita Antonia V. Luis – Vice-Dean, launched the Golden Jubilee Seal sticker to be used in the College's correspondence. This offered the opportunity to thank everybody for the fruitful year of work and renew hopes and enthusiasm about activities and celebrations during 2003.
- March 27/2003 – “Tree Planting” Ceremony to honor the past generations of EERP/USP directors, faculty, staff and students – Celebrations were marked by speeches and music. On this day, past and present met and planted trees, sowing the seeds of the future.
- March 27/2003 – Formalization of the Project “EERP/USP adopts the State School Gleite de Alcântara (EEGA)” – much more than social responsibility, this project created links between both institutions. Various activities were realized at EERP and EEGA with a lot of joy and expectation on both parts.
Much more than offering educational resources, material and guidelines to EEGA, EERP/USP has received learning and renovation.
- May 07/2003 – Publication of a commemorative message for the Day of the Nurse and the EERP/USP Golden Jubilee on USP staff payment letters
- May 08/2003 – Nomination Ceremony of new members of Chapter Rho Upsilon – Sigma Theta Tau International – Honor Society of Nursing and commemoration of the first anniversary of this Chapter.

- May 12/2003 – Introduction of the EERP/USP Golden Jubilee Commemorative Stamp, granted by the Brazilian Mail and Telegraph Company – in a speech during the ceremony, Isabel Amélia Costa Mendes – EERP Dean, expressed the College's gratitude for the tribute given by the company: "I cannot express the joy of EERP/USP about receiving the tribute of the Brazilian Mail and Telegraph Company – one of the most competent Brazilian governmental institutions, which is highly considered in society for the excellency of its services and expressed its recognition and prestige to the work of this College. Besides disseminating this event by mail, the EERP/USP Commemorative Stamp, means the perpetuation of a date by means of a symbol with a very strong cultural connotation.

Hence, we express the gratitude of EERP/USP and reaffirm our feelings of honor and joy about the tribute".

- May 20/2003 – Solemn Session of the Ribeirão Preto Municipal Chamber, to honor the 50th Anniversary of EERP/USP – was a unique moment for the entire EERP/USP Community present at the Chamber's tribute to the School.

Throughout the ceremony of the lamp – the symbol of nursing, the speech of the municipal authorities, given by Councillor José Antonio Lages, who proposed the tribute to EERP and the Certificate awarded to Dean Isabel, the College was granted with the consideration, recognition and respect of the people of Ribeirão Preto for being an Institution of Excellence in education, research and Nursing care.

- August/2003 – International Symposium: Nursing Knowledge Innovation and Dissemination – Encounter of national and international specialists, nurses, professionals from health and related areas, faculty, undergraduate and graduate students to share distinct realities and views and discuss fundamental themes for their professional practice.

Conquests, knowledge, ideas and expectations. We hope that the exchange will favor the creation of academic relations, resulting in innovative research and proactive attitudes in view of the different demands that come up nowadays.

And that is not where it ends. In the next months, we invite everybody to:

September

- Workshop: "15-year history of the WHO Collaborating Center for Nursing Research Development".
- Inauguration of the Pau Brasil forest

October

- 08 to 10 – I Brazilian Pediatric and Neonatal Nursing Congress

December

- Presentation of the EERP/USP anthem
- Special edition of the Latin American Journal of Nursing, showing EERP/ USP in the view of its constructors and partners within and outside the walls of USP.

2004

- April 5 to 8 – VIII Encounter of Mental Health Researchers and VII Encounter of Psychiatric Nursing Specialists
- May 27 to 28 – XI SIBRACEN – Brazilian Nursing Communication Symposium
- November 7 to 10 – 15th International Congress on Women's Health Issues

Let's celebrate!

Project: Successful Leaderships among EERP/USP Graduates

On the occasion of the Golden Jubilee, we are stimulated to visit the smallest drawers in the memory of this College, identifying conquests, difficulties, meetings and goodbyes, joy, some sadness, in short, a whole bag of experiences that allowed the EERP to arrive at the vigor of its 50 years with national and international

recognition as a center of excellence in the formation and development of human resources for nursing education, research and care.

Thousands of actors joined us on this road: 1919 Bachelors in nursing, 169 nursing Licentiates, 799 Masters and Ph.D., 280 nursing aids, hundreds of students in specialization and other

courses, a few hundreds of faculty and staff.

In the framework of this contingent of people, a project was included in the list of commemorative activities which would honor successful leaderships among Ribeirão Preto College of Nursing graduates.

The first of these tributes occurred on May 08 2003, after the nomination ceremony of new members of Chapter Rho Upsilon – Sigma Theta Tau International – Honor Society of Nursing, when EERP/USP honored the Nurse Maria da Glória Miotto Wright, affectionately called Glorinha, the current International Coordinator of the CICAD Schools of Nursing Project on Prevention of Drug Use and Abuse in Latin America.

In the presence of her family members as special guests, her history was told from childhood to the personal and professional conquests that resulted from her experience. Relevant facts were highlighted, which identify Glória as successful leadership.

- Due to her inquisitive spirit, inborn curiosity and dedication to people, she wanted to become a missionary to work in underdeveloped countries;
- She chose Nursing and obtained her Undergraduate degree at EERP/USP in 1971. Glória got married in 1972 and went to live in the United States with her family one year later.
- From 1975 to 1977, Glória took a Masters degree in Preventive Medicine at Ohio State University;

- She went back to Brazil in 1978 and worked at the Ministry of Education and Culture in the Health Sector Group – Brazilian Nursing School Expansion Program.

- From 1979 to 1981, Glória worked as an assistant Professor at the University of Brasília Nursing Department.

- Between 1981 and 1984, EERP/USP was happy to once again receive Glória, this time as a Ph.D. student, advised by Judith Costa and José Eduardo Dutra de Oliveira.

- From 1986 to 1989, she was a Technical Advisor at the National Scientific and Technological Development Council for the Nursing field.

- Glória returned to the United States in 1991 and, from 1992 to 1996, she worked as a Consultant for the Pan American Health Organization in Washington.

- From 1994 to 2001, she was a faculty at Georgetown University School of Nursing and Assistant Professor at the School of International Relations at the same University.

- Since 1998, she has been a member of the Inter-American Commission that functions as the International Coordinator of the

CICAD Schools of Nursing Project on Prevention of Drug Use and Abuse in Latin America.

- In 2001, EERP had the pleasure to receive Dr Wright, establishing a partnership between this University and CICAD for realizing the I Regional Research Training Program in the Study of the Drugs Phenomenon for Latin American Nursing Faculty, which was repeated when the II group of this Program started.

Dr. Wright's career illustrates her determination, undertaking and strength. She was awarded with the "Nursing Leadership" Prize, demonstrating EERP's recognition to one of its renowned daughters.

For the good of national and international nursing, Dr. Wright shares with other nurses the identification and recognition for being a Nursing Leadership among EERP/USP graduates. She was the first to be celebrated, but other surprises will come in this time of Jubilee commemorations, since one of the reasons for celebrating the 50 years of EERP/USP that makes us most proud and touched is to see the success achieved by the nursing professionals graduated here.

LECTURE CYCLE:

"NURSING TENDENCIES IN EDUCATION, RESEARCH AND CARE"

During the week from August 04 to 08, EERP/USP will receive the visit of renowned Nursing specialists who will present the members of our scientific community with expositions, followed by discussion about paramount themes for the construction of nursing knowledge and for strengthening this knowledge area.

On August 04, Genevieve Gray, Dean of the University of Alberta School of Nursing - Canada, who is a specialist in Nursing Education, is offering a lecture on Nursing Knowledge Communication: challenges for associating research with practice, at 9.00 a.m., in Room Cinza at EERP/USP. Dr. Gray's lecture will be followed by a discussion about Elaboration of the competency curriculum in Nursing with members of the EERP-USP Undergraduate

Commission.

On August 05, Dr. Gray is talking to the members of our academic community about the formation of the International Academic Nursing Alliance. After this lecture, another presentation is offered about Professional Development Planning. This activity will be realized by Chapter Rho Upsilon of Sigma Theta Tau International – Honor Society of Nursing and is open to public. The event will occur at 9.00 a.m. in Room Cinza.

After the International Symposium, on August 08, EERP-USP is receiving the visit of Dr. Consuelo Castrillón, Chairperson of the Latin American Association of Nursing Schools and Faculties – ALADEFE, who is talking about "Application of Research Results in Nursing Education", from 8.30 a.m. to 9.30 a.m.,

in Room Cinza. Next, at 9.30 a.m., EERP/USP is receiving the visit of the WHO Senior Scientist for Nursing and Midwifery, Dr. Naeema Al-Gasseer, who will present her experiences in a lecture about "WHO expectations about the expansion and application of Nursing knowledge".

These events are open to public and present a unique opportunity for exchange with nursing specialists from various parts of the world. Come and Participate!

These lectures are offered for free and enrollments can be made at the General and Specialized Nursing Department Secretariat at EERP-USP - (16) 602.3428 / e-mail: ege@eerp.usp.br.

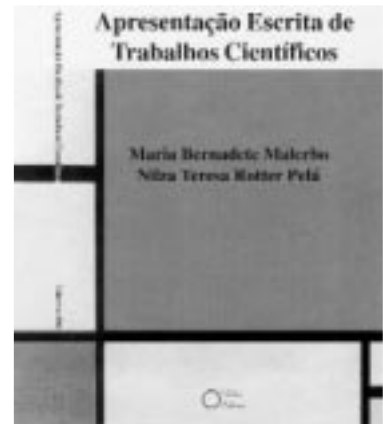

Promotion: GEPECOPEN – Nursing Process Communication Research and Study - EERP/USP.

“SCIENTIFIC WORK:
turning its elaboration and organization less complicated”

Nilza Teresa Rotter Pelá
Maria Bernadete Malerbo

Faculty - EERP/USP
Librarian - Latin American Journal of Nursing - EERP/USP

“Written presentation of scientific studies” aims to provide guidelines for the elaboration and organization of scientific studies as well as for quotations from other documents that must be included in writing.

This book is the result of professional experience linked up with countless doubts we have received.

Initially, two stenciled texts were elaborated, which were met with great acceptance by the scientific community of the University of São Paulo (USP) at Ribeirão Preto. This resulted in suggestions and requests that gave rise to the idea of publishing this work, which was then elaborated and is now published in the form of a book.

The collaboration between a librarian and a research methodology teacher, each of whom contributed with complementary views from different scientific production angles, resulted in a text that supports the researcher during the writing phase.

Its contents is divided in 13 chapters, the first two of which present the aspects ruling scientific work conventions and format in a practical and clear way.

Chapter 3 to 8 deal with rules to be applied during the elaboration process.

Author's right is discussed in Chapter 9, treating register, intellectual ownership and legal deposit.

The standards for the elaboration of bibliographic references to electronic documents are presented in Chapter 10, which offers examples that enable the researcher to make reference to this kind of documents.

In Chapter 11, Bibliographic References, we present the standards issued by ABNT NBR 6023/2002 and add the models required by the American Psychological Association (APA) and those of the Vancouver Group, adopted by some biomedical journals.

The final chapters present the structure of a research project and the legislation in protection of author's rights in Brazil.

The book's simple but clear presentation is directed at all persons who are preparing to write and organize a scientific study.

During the International Symposium “Nursing Knowledge Innovation and Dissemination” promoted by the University of São Paulo at Ribeirão Preto College of Nursing, the book is officially presented in the presence of the authors.

BRAZILIAN PEDIATRIC AND NEONATAL NURSING CONGRESS
IV São Paulo Pediatric Nursing Congress
III Neonatal Nursing Encounter

These events will be realized by the Department of Maternal-Infant Nursing and Public Health - MISP of the University of São Paulo at Ribeirão Preto College of Nursing from October 08 to 10, 2003. The central theme is: Nursing and the Child: conquests and challenges for the 3rd millenium.

Further information, enrollments, study presentation standards: MISP Department Secretariat - EERP/USP - Av. Bandeirantes, 3900 - Campus Universitário. CEP 14040-902 - Ribeirão Preto/SP - Phone: (16) 602.3391. Email: misp@eerp.usp.br or limare@eerp.usp.br. Site: <http://www.eerp.usp.br/Eventos/Congressos/CBEPEN/>.
